Adaptability

PROFILE

Flutter Developer with 4+ years of experience building cross-platform mobile applications for iOS and Android using Flutter and Dart. Worked on commercial products in Smart Home and BeautyTech domains, focusing on scalable architecture, clean code, and developer experience. Skilled in Flutter, BLoC, REST API integration, Firebase, and modern mobile development workflows.

LinkedIn profile: www.linkedin.com/in/nikolay-potehin

EMPLOYMENT HISTORY

Flutter Developer at Polka LLC, Moscow

Mar 2025 — May 2026

Development of a mobile ecosystem for beauty service customers and professionals.

Key achievements:

- Built and maintained cross-platform mobile applications using Flutter and Dart
- Developed a monorepo architecture with shared local libraries, reducing feature development time for both applications by approximately 2x
- Created AI-oriented development skills/tools that automated repetitive engineering tasks and improved workflow efficiency by ~60%
- Implemented pixel-perfect UI based on Figma designs
- Integrated analytics, crash reporting, deep links, and websocket communication
- Collaborated with designers and backend developers to improve product quality and development speed

Technologies:

Flutter, Dart, BLoC, Dio, Firebase, GoRouter, AppMetrica, WebSocket, App Links

Flutter Developer at K Telecom LLC, Yekaterinburg

Jun 2022 — Feb 2025

Development of a Smart Home mobile application for iOS and Android platforms.

Key achievements:

- Designed and implemented a reusable UI Kit that accelerated new screen development by ~50%
- Introduced DTO and repository code generation using freezed, retrofit, and json_serializable, improving development speed by ~30%
- Developed a critical event notification system for Smart Home monitoring
- Participated in API design, code reviews, architecture discussions, and engineering process improvements
- Configured code style standards, linting, and development best practices across the project

Technologies:

Flutter, Dart, BLoC, GetIt, Hive, Dio, Retrofit, Freezed, Firebase, Socket.IO, REST API

EDUCATION

- Bachelor's Degree in Applied Informatics, Ural Federal University, Yekaterinburg
Feb 2021 — Jun 2025
 - Achieved 1st place nationwide in the Samsung Ecology Hackathon
 - Developed a cross-platform Flutter application for discovering street art works, artists, and festivals in Yekaterinburg as part of a university project
